SUMMARY

Senior Software Engineer with 5+ years of experience building high-performance web applications, observability platforms, and developer tooling. Proven track record of leading frontend modernization efforts, delivering AI-powered features, and improving system performance. Strong expertise in TypeScript, React, Go, Ruby, and distributed systems architecture.

SKILLS

Languages: TypeScript, JavaScript, Ruby, Python, Go, C/C++, OCaml, SQL, Haskell, Rust | Frameworks: React, Redux, Ember.js, Tailwind CSS, Ruby on Rails, GraphQL, FastAPI, Node.js | Tools: Docker, Kubernetes, AWS, GCP, Redis, PostgreSQL, GitHub Actions, CI/CD

EXPERIENCE

Senior Frontend Engineer, SuitePad GmbH
Berlin, Germany | July 2025 - Present

- Led end-to-end development of AI Concierge feature, integrating dashboard APIs, real-time chat suggestions, markdown rendering, and tablet-optimized UX—delivering a production-ready conversational AI experience for hotel guests
- Drove large-scale Ember.js modernization effort, resolving 20+ deprecation categories (router, data layer, concurrency patterns, component co-location) across 140 commits to prepare the codebase for major framework upgrades
- Established frontend engineering standards by implementing custom ESLint plugin, pre-commit hooks with Husky/lint-staged, multi-stage Docker builds, and enhanced EditorConfig—improving code quality enforcement and CI efficiency

Senior Product Engineer, Ravka
Rotterdam, Netherlands | Jan 2024 - July 2025

- Pioneered BearSignals, an intelligent observability platform inspired by the academic STEAM paper, designing a cohesive architecture with a Go ingestion engine, Python analytics layer, and React frontend for stateful, seamless monitoring
- Engineered a high-throughput data pipeline and automated root cause analysis services, providing developers with actionable insights and reducing system debugging time

Senior Frontend Engineer, HousingAnywhere
Rotterdam, Netherlands | April 2022 - Jan 2024

- Engineered a complete overhaul of front-end search infrastructure using React and TypeScript, directly leading to a 35% increase in search-to-booking conversion
- Improved core UI search performance by 40% through incremental prefetching and caching, reducing average page load time for millions of users
- Architected and developed a full-stack feature flagging console (React, TypeScript, Go), enabling product teams to self-manage A/B tests and cutting experiment result retrieval from days to minutes

Senior Software Engineer (Contract), Andela
New York, US (Remote) | May 2021 - Dec 2023

- SayRhino: Architected fault-tolerant, event-driven system using Sidekiq and Redis to scale post-fulfillment operations; refactored legacy React codebase into modular design system with Tailwind CSS, cutting maintenance time by 25%
- Leafly Inc: Spearheaded critical Ruby on Rails upgrade (2.5 to 3.0), enhancing system performance and security; engineered scalable GraphQL APIs reducing backend query times by over 30%

Software Engineer, Petra Trust
Accra, Ghana | Dec 2019 - Jan 2021

- Architected and developed "Phoenix" unified CRM by designing cross-functional GraphQL API (Ruby, PostgreSQL) and responsive UI (React, TypeScript), reducing user task completion time by 25%

EDUCATION

Master of Science in Advanced Computer Science (Distinction)

University of Leicester, UK | 2019

NOTABLE PROJECTS

RTPL
High-performance real-time market data processing system for low-latency trading applications

L-Language
Minimal functional programming language implementation (Haskell, React)

SQLL
Open-source SQL client library for Python using SQLite

PRICC
Open-source C project generator written in Rust
